Mika Mustonen

Flagship Sustainable Forest Management in the Baltic Sea Region – EFINORD

Realizing the Bioeconomy in the Baltic Sea Region
26-27 March 2014, Tallinn

EFINORD

North European Regional Office of the European Forest Institute.

A regional networking organisation, coordinating and promoting forest research on sustainable forest management.

35 network partner institutions, 16 countries

Themes:

- **Intensive forest management and biomass production**
- **Ecosystem services provided by forests serving urban societies**

EFINORD flagship – an umbrella for forest-related projects within PA Agri

- **Coordination group: Finnish Ministry of Agriculture and Forestry, Nordic Forest Research-SNS and EFINORD**
- **Contribution and implications to the HA for Bioeconomy**
 - (3) promote sustainable production and use of biomass in the Baltic Sea region
 - (4) cluster already existing activities and projects in the field of bio-economy and promote science-policy dialogues;
 - (5) pooling forces and bringing together public and private players in closer partnerships
 - (6) establish networks and dialogue amongst actors across national and sectorial borders in the Baltic Sea region in order to develop common data and knowledge base, methods and strategies for a knowledge based sustainable bio-economy
- Forests a cross cutting topic → Collaboration with PA:s in forest-related issues

EFINORD flagship projects

- **Forestry and Water Protection**
- **Baltic Landscape in change – innovative approaches towards sustainable forested landscapes**
- **NB Forest – Nordic-Baltic research based information on forests**
- **Tree genetic resources in the Baltic Sea Region under changing climate**
- **Dieback of spruce stands in the Baltic Sea Region**

EFINORD flagship projects

- **Nature Hardwoods**
- **Adaptive Forest Management and Biomass Production**
- **Proposal**
- **Energy Markets in the Baltic Sea Region**

Four ended:

- **Wood products environmental values**
- **Sustainable Forest Management in Kaliningrad**
- **Forestry based hardwood production**
- **Genetics of Broadleaved trees in changing climate**
